SUMMARY

Computer Science graduate (CGPA: 3.83) from UET Taxila specializing in **Artificial Intelligence, Computer Vision, Deep Learning**, and end-to-end Machine Learning pipelines. Experienced in building real-time traffic monitoring systems using YOLO architectures, developing AI-powered analytics dashboards, and implementing NLP solutions. Proven expertise in object detection, custom model training, license plate recognition, and full-stack dashboard integration. Seeking an AI/ML, Computer Vision, or Data Analytics role to apply technical and analytical skills in real-world projects.

EDUCATION

University of Engineering & Technology (UET), Taxila <i>Bachelor of Science in Computer Science</i>	Sep 2022 – Jun 2026 CGPA: 3.83 / 4.00
Fazaia Inter College Minhas, Kamra <i>FSc Pre-Engineering</i>	Jun 2020 – Jun 2022 Percentage: 94%

TECHNICAL SKILLS

AI / ML: Deep Learning (CNNs), YOLOv11, Computer Vision, NLP, EasyOCR, TensorFlow, Keras, PyTorch, Scikit-Learn, OpenCV
Data Analytics: Power BI, Tableau, SQL, Pandas, NumPy, Matplotlib
Programming: Python, React, Flask, Streamlit, JavaScript
Tools: Git/GitHub, Power Query, n8n Automation, AI Agents

EXPERIENCE

Machine Learning Intern <i>Elevo</i>	Sep 2025 – Oct 2025 <i>Remote</i>
- Developed a CNN-based Traffic Sign Recognition model for autonomous driving applications. - Built predictive analytics models including Loan Approval Prediction and Student Score Prediction using machine learning techniques.	

ACADEMIC PROJECTS

NextGen Traffic: AI-Powered Smart Traffic Monitoring System	FYP
<i>Technologies:</i> Python, YOLOv11, SORT, EasyOCR, React - Built a real-time intelligent traffic monitoring system using YOLOv11 and SORT for vehicle detection and tracking. - Implemented custom vehicle training to detect local vehicle categories including rickshaws, cars, buses, trucks, and motorcycles. - Developed vehicle counting and traffic flow analytics using direction-aware tracking logic. - Integrated license plate recognition (LPR) using EasyOCR for automated vehicle identification. - Implemented helmet detection, wrong-way driving detection, triple-riding detection, and accident detection modules. - Designed a React-based live monitoring dashboard for real-time traffic statistics and violation alerts. - Project Link: linkedin.com/posts/uzair1434_fyp-finalyearproject-nextgentraffic	
DeepFake Detection System	99% Accuracy
<i>Technologies:</i> Python, CNN, Streamlit - Built and deployed a custom CNN model achieving 99% accuracy in detecting AI-generated images. - Integrated the model into a Streamlit web application for real-time image testing. - Project Link: linkedin.com/posts/uzair1434_ai-deeplearning-cnn	
Age & Gender Prediction System	90% Accuracy
<i>Technologies:</i> TensorFlow, Keras, OpenCV - Developed a custom CNN model for age and gender prediction using the UTKFace dataset.	

- Achieved 90% accuracy through hyperparameter tuning and robust preprocessing techniques.
- Project Link: [linkedin.com/posts/uzair1434_ai-deeplearning-computervision](https://www.linkedin.com/posts/uzair1434_ai-deeplearning-computervision)

SMS Spam Classification System

98%+ Accuracy

- *Technologies:* NLP, Scikit-Learn
- Developed an NLP-based spam detection model using TF-IDF vectorization.
- Trained and evaluated Naive Bayes, SVM, and Logistic Regression models with over 98% accuracy.
- Project Link: [linkedin.com/posts/uzair1434_machinelearning-nlp-spam-detection](https://www.linkedin.com/posts/uzair1434_machinelearning-nlp-spam-detection)

Car Sales Analytics Dashboard (Power BI)

Power BI

- *Technologies:* Power BI, Power Query
- Created a dynamic multi-page dashboard for sales, pricing, and mileage analysis.
- Implemented interactive slicers, KPIs, and fuel-type market share visualizations.
- Project Link: [linkedin.com/posts/uzair1434_powerbi-dataanalytics-datavisualization](https://www.linkedin.com/posts/uzair1434_powerbi-dataanalytics-datavisualization)

Car Sales Analytics Dashboard (Tableau)

Tableau

- *Technologies:* Tableau
- Designed an interactive multi-page dashboard with drill-down analysis and KPI tracking.
- Strengthened analytical storytelling and business intelligence reporting skills.
- Project Link: [linkedin.com/posts/uzair1434_tableau-dataanalytics-dashboard-design](https://www.linkedin.com/posts/uzair1434_tableau-dataanalytics-dashboard-design)

Real-Time People Counting System

YOLO11n + SORT

- *Technologies:* YOLO11n, SORT, Python
- Developed a retail analytics system to detect, track, and count people entering and exiting a store.
- Project Link: [linkedin.com/posts/uzair1434_artificialintelligence-computervision-yolo11n](https://www.linkedin.com/posts/uzair1434_artificialintelligence-computervision-yolo11n)

CERTIFICATIONS

Computer Vision: YOLO Custom Object Detection with Colab GPU	Coursera
Python for Data Science, AI & Development	IBM (Coursera)
Machine Learning with Python	IBM (Coursera)
The Complete MySQL from Scratch: Bootcamp	Udemy

ACHIEVEMENTS

- Scored 73 Percentile in NSCT (National Skill Competency Test).
- Completed the ACM UET Fellowship AI Track focused on Artificial Intelligence research and collaboration.
- Maintained strong academic performance with CGPA 3.83 in BS Computer Science.
